

At this step, we filled all of our tables with at least 5 rows. Then, we implemented a web interface administration panel, which includes all of our tables in the database. In the panel, you can click all of our tables and do operations on each table such as insertion, deletion and selection. You can see every page we created below:

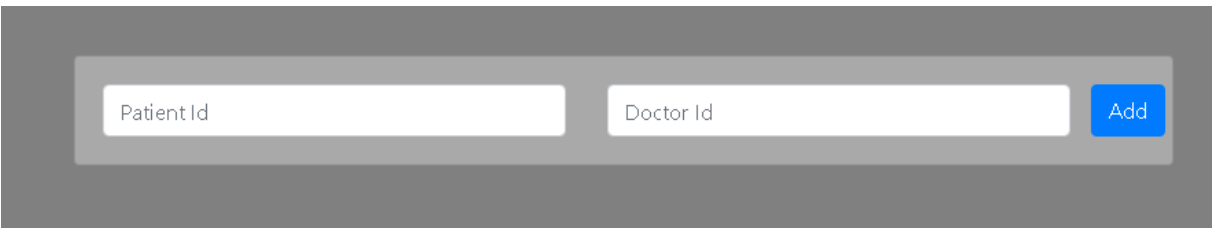

Main Page

"Attends" Page (All main pages for each table is same)

"Attends" Insert

“Attends” Delete

Doctor ID:
Patient ID:

“Attends” Selection

Patient Id:
